Profile

Cybersecurity enthusiast and full stack developer with hands-on experience in web application penetration testing and software development. Completed internships as a Cybersecurity Trainee and Software Engineering Trainee, working on reconnaissance, vulnerability testing, and application development. Skilled in technologies including HTML5, CSS3, JavaScript, Angular, React, PHP, Java, Python, and C#, with experience in MySQL and MongoDB. Passionate about building secure, scalable applications and continuously improving in both cybersecurity and development.

Areas of Expertise

Strong foundation in full stack development with hands-on experience in frontend technologies such as HTML5, CSS3, JavaScript, Angular, and React, along with backend development using PHP, Java, Python, and C#. Knowledgeable in database management using MySQL and MongoDB.

Experienced in cybersecurity fundamentals through practical exposure to penetration testing, including active and passive reconnaissance, Google Dorking, DNS enumeration, and vulnerability analysis using tools like Kali Linux and Burp Suite. Passionate about secure development, ethical hacking, and continuously learning emerging technologies.

Online Courses & Certifications

- Front End Development - HTML (July. 2023) - [Great Learning](#)
- Front End Development - CSS by Great Learning (July. 2023) - [Great Learning](#)
- Introduction to Artificial Intelligence by Naan Muthalvan(Jan. 2024) - [Infosys Spring Board](#)
- MS Office by Naan Muthalvan (Jun. 2022) - [Microsoft](#)
- Git And GitHub learned by LinkedIn Learning (May.2024).
- HACKATHON Project-Based Learning 2026 - Tamil Nadu Innovation Initiatives (TANII).

Education

Master of Computer Applications [Presidency College Chennai](#)

Madras University 2024- Present

BSc Computer Science (66%) [Muthurangam Govt Art's College](#)

Thiruvalluvar University 2021-2024

Relevant Courses: Software Testing, Data Base Management System, Programming in c , c ++ , Java , Mobile Computing , Visual Basics, macromedia Flash , Unix , OOPS concept .

Skills

- Front End: HTML5, CSS3, JavaScript, Tailwind CSS, Bootstrap, Angular, AngularJS, React.js
- Back End / Programming: Java, PHP, Python, C#
- Database : MySQL, MongoDB.
- Programming Language : C, C++, Java (Basic), Python
- Cybersecurity & Penetration Testing: Active & Passive Reconnaissance, Google Dorking, DNS Enumeration, Web Application Testing, Vulnerability Assessment, Phishing Simulation.
- Tools & Software: MS Office, Photoshop, Flash, Git & GitHub, Visual Studio Code
- Soft Skills: Creative Problem-Solving, Adaptability, Teamwork, Innovation, Active Learning
- Current Interests & Learning : Learning Ethical Hacking basics via Kali Linux and CTFs ,
Improving Secure Coding Practices

Projects & Initiatives

- Library Management System: Built using Visual Basic 6.0 for book/membership tracking
(Built using Visual Basic to manage book records, user data, and borrowing processes.)
- She-Guardian App (Phishing Detection & Prevention)
(Developed a security-focused application to detect and prevent access to phishing links, enhancing user safety against malicious websites.)
- ReconPro – Cross Platform Recon Tool
(Built a reconnaissance tool to perform information gathering as part of penetration testing, supporting cross-platform usage.)
- Rubber Ducky (Educational Security Project)
(Developed a USB-based keystroke injection model to demonstrate hardware-based attack techniques for educational purposes.)
- Supermarket Billing System (Frontend – C#)
(Designed and developed the frontend interface for a billing system to manage transactions and user interactions.)
